

OCT

Optical Coherence Tomography

OCT scanner is able to generate highly detailed, three dimensional and cross sectional images of the structures within your eyes.

- Detects Macular Degeneration, Glaucoma, Diabetic retinopathy, and so many other eye problems
- With early detection we can start treatment sooner
- It's quick and painless
- All patients should have an initial OCT to use as baseline
- Patients over 40 with a family history of disease should have one annually

The Cost is \$39:
